RIGGING/SUSPENSION OF LOADS

The **CCC** management must approve all rigging/suspension of loads from any part of the facility structure.

1. All signs, banners, and displays suspended from exhibit hall ceilings must be approved in advance and hung by **CCC** or general service contractor personnel.
2. If you are using any part of the facility structure for rigging or the suspension of loads, you must submit to **CCC** two copies of your rigging plot to Exhibitor Services two months prior to move in for the **CCC** approval. Part of this requirement is due to possible shared or compounded loading between booths or different shows and even between levels of the convention center which can also be a concern. This is even more important on larger shows where several booths are rigging within proximity to each other.
3. All submittals will need to be overlaid in the correct location and orientation onto the Reflected Ceiling Plan (RCP) for the relevant area for proper review to take place (these drawings can be provided in .DWG or .PDF format if they are not on file already and/or upon request).
4. The rigging plot should conform to the following:
 - A. Name of show, show dates, building location; the name of the contractor responsible for rigging, including contact information; and if applicable, the names of the audio, lighting and scenery contractors. Contact information should be printed on the plans.
 - B. Rigging plots must be drawn in 1/16"=1' scale.
 - C. Rigging plots must indicate locations of points, loads for each point, and a legend that explains the use of each point; such as audio, lighting, and scenery.
 - D. Rigging plots must include facility column locations and roof steel locations.
5. The first point of contact for this should be your event manager. However, for more specific information, requirements, and limitations regarding rigging/suspension of loads at the **CCC** or for any inquiries that have not been assigned a specific point person please contact:

Jason Hiester
Technical Services Manager
303.228.8126
jhiester@denverconvention.com

Joe McCullough
Director of Operations
303.228.8026
JMccullough@denverconvention.com

6. If submittals do not meet/or exceed the outlined acceptable criteria the building provides, the rigging plan may need to be sent to the Structural Engineer of Record (SER) for approval at an additional cost. **Note: this SER review can add additional time to the review/approval process. If the rigging plan is not submitted 30 days prior to the first move in date a \$500.00 review fee will be charged in addition to any applicable SER fee's or cost.**
7. If not received in a timely fashion, rigging oversight charges may also apply and any rigging work may not be performed until a submittal is made and the plan has been approved by the building/Operations.
8. Without all the information being submitted with ample time to review it limits options.

BASIC FIRE CODE REGULATIONS

1. Exits in all areas of the facility should not be blocked or covered for any reason.
2. Exterior and loading dock doors and fire doors may not be propped open.
